

PROJECT TITLE : PRAGATHI

Abstract

The project titled “Pragathi” aims at developing a system which provides an efficient way of managing the activities of Kudumbhashree in different Gramapanchayath. The existing system is a complete manual system since it has no official site or web applications. There are five main modules in this system. One is administrator module which view entire activities and grant permission for them. Second module is Community Development Society, CDS module which includes verification of products and can add ads members details. The third module is Area Development Society which includes marking of attendance and manage the activities of micro finance. The fourth module is the Neighbour Hood Group, NHG module which includes registration of members and can view their attendance and jobs offered by users. The fifth module is the users, they can give small job opportunities for members in each unit and can buy items sold by kudumbhasree units.
